

## SuperLink 5 for Windows

Central software for control and remote control

SuperLink 5 is an advanced PC-program with a graphic user interface. SuperLink 5 provides an easy and reliable control of all Senmatic DGT-Volmatic's climate computers and fertilizer mixers.

The program offers many new facilities and options for collection of climate and fertilizer data.

### Central control

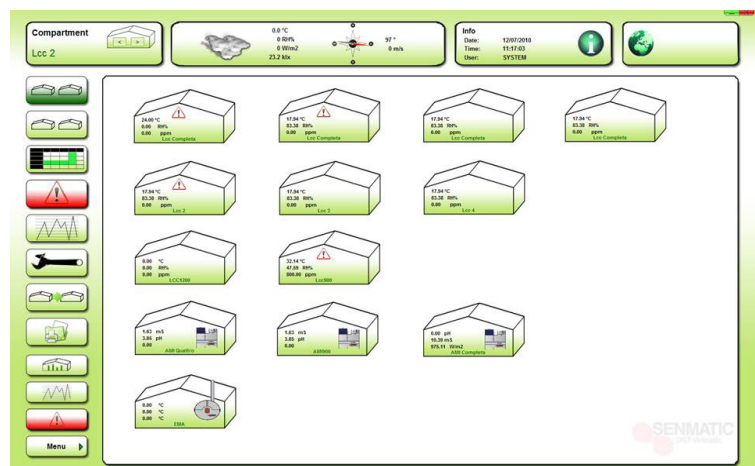

SuperLink 5 makes it easy and fast to read and adjust the conditions in various departments, as all information can be shown in and controlled directly from a central computer in the company. SuperLink 5 guarantees the best possible utilization of our advanced equipment for controlling of climate, irrigation and fertilization..

### Remote control and support

With SuperLink 5 it is easy to control and adjust from any location, using a laptop or smartphone. With SuperLink 5 you can get support directly from our hotline at Senmatic in Sønderød.
